

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

For this purpose, a considerable part of the teaching, in the advanced classes, is done by Lectures.

## VI. MODERN LANGUAGES.

By a recent statute of the Corporation, regular instruction in the principal languages of modern Europe, is furnished to the students at a moderate additional expense, in accordance with such arrangements as the Faculty may adopt. Professor Struvè has been appointed instructor in French, German, Italian and Spanish, and for the present year, will give instruction in these languages to the Senior and Junior Classes.

It is required by the statutes of the University, that the above studies be pursued, and the regular examinations in them sustained, by every person who intends to become a candidate for the degree of Bachelor of Arts.

The instructions of the several departments are, however, accessible to those students who do not wish to become candidates for a degree, but only to pursue particular studies. They may be admitted to the Partial Course, and attend such recitations as they may elect, provided they are qualified by previous acquirements. Such students are also, in all respects, subject to the laws of the University, in regard to good conduct and diligence in study.

The Faculty are aware that the above course of studies cannot be advantageously pursued, except by persons who have attained some degree of intellectual maturity. Such, however, they think, must be the case with any course of discipline, intended really to lay the broad foundations of a liberal education, or to prepare young men for the learned professions. It might also be suggested, that individuals whose youth may disable them from pursuing the above studies with success, would do wisely to delay the commencement of a collegiate education to a somewhat later period. The arrangements of such a seminary as this, presuppose in the pupil some power of self-government, and some decidedly formed feelings of social and moral responsibility. Until the character of a young man be thus far formed, he is too young to enter a public institution.

### LIBRARIES.

The College Library is in Manning Hall, and at present contains 10,200 well selected volumes. It is constantly increasing from the proceeds of a permanent fund established for this purpose. In addition to the College Library, the Libraries of the Philermenian and the United Brothers' Societies comprise together about 7000 volumes, making in all, upwards of 17,000 volumes, accessible to all the students of the University.

### CABINET.

The Cabinet, together with the apparatus of Chemistry and Natural Philosophy, is in Rhode-Island Hall, which is furnished with spacious Lecture rooms for the accommodation of the departments of Mechanical and Physical Science. A collection of Specimens, for the purpose of illustration in Geology and Natural History, was commenced some years since, and furnishes valuable aid to the instruction in these sciences.

### PREMIUMS FOR THE YEAR.

The Corporation of Brown University, desirous of cultivating a generous love of science, and of rewarding with marks of distinction, those students who have attained to distinguished excellence in scholarship, and who have, also, sustained an unblemished moral character,—have appropriated two hundred dollars, to be awarded in premiums, either in money or books, to such competitors as may by examination prove themselves most meritorious.

### I. REGULATIONS AND DISCIPLINE.

The *Regulations* of the institution are formed with the single design of promoting the intellectual and moral advancement of its members. They are made public, and may be known by every candidate before admission. If at any time, a student become dissatisfied, he is at liberty immediately to withdraw, with every testimonial of scholarship and character to which he is entitled.

The *Discipline* of the institution is intended to be strictly parental. The officers desire to cultivate with their pupils habits of kind and familiar intercourse, and to influence them rather by an appeal to the better principles of the heart, than by severe or disgraceful punishment. If, however, the conduct of a student render it evident that he is not susceptible of such influence, he is immediately, and, if possible, without disgrace, returned to his friends, in the hope that under other circumstances, he may yet form a character which will give promise of usefulness. Immoral or disorderly conduct, or habitual negligence in his attendance upon collegiate duties, is always considered a sufficient reason for directing a student to leave the institution. If any student, after having completed the studies of any year, shall upon examination, be found incompetent to pursue the studies of the year succeeding, he is permitted without additional expense of tuition, to enter the class immediately below him, and thus enjoy a second opportunity of qualifying himself to proceed in the course.
